Upgraded version of the Fairyland

NOTICE OF ASSEMBLE

Tips for Assembling Wood

Find the corresponding block number, use a knife in the connection point gently press, you can take out the wood.

Use a knife to smooth out the burr.

Or use sandpaper to smooth out the burr

Testing on LED function

Be sure to test the LED lights before making the lighting, note that the LED white wire to the negative, gray wire to the positive reference to the following figure operation test.

1

DO NOT contact the LED wire end direct to the battery cell.

2

Use the provide battery holder. Make sue the correct polarity.

How to assemble the battery holder

1. Material and tools needed:
- Battery holder, LED bulb, tape, screw driver and 2 pieces AAA size battery(not provided)

2. Use screw driver and take the lid off from the battery holder.

3. Insert the battery take notes on the polarity.

4. Connect the red wire to grey wire. Connect the black wire to white wire.

5. Wrap the exposed wire with the tapes.

6. Place the box lid and fastness with screw driver.

combination part according to 1 2 3 so on.

About the use of glue

Method for using glue:

1. After applying the glue, let it dry for a few seconds before pasting.
2. Fix it slightly with your hands, and finally put it aside to dry;

Tips:

When pasting the plane printing paper, a piece of waste bank card or telephone card can be used to wipe evenly after the glue is smeared on the wood board, and then the printing paper is pasted to squeeze out the air inside.

Types of glue:

White latex: Used for adhering soft materials, such as wood and paper.
Alcoholic Glue: Used for adhering hard materials such as cloth, plastic, beads, wire, dust cover, etc.

Disclaimer: This wire cannot be plugged into the output socket

- LED lights before use, should can test the light
- Can use two AAA batteries
- The positive and negative poles of the battery are aligned and the battery is installed
- Non-rechargeable batteries, cannot be charged
- Rechargeable batteries can only be charged under adult supervision
- Rechargeable batteries should be removed from the toy before charging
- Different types of batteries or old and new batteries cannot be mixed
- Batteries should be inserted with correct polarity
- Exhausted batteries should be removed from the toy
- The power terminal must not be short-circuited

1 Peel off 1 cm of rubber from the heads of all wires

2 Connect the Black and LED white wires of the battery box, as well as the red and gray LED gray wires of the battery box, respectively

3 Wrap the threads of the same color together

4 Connect the battery box

5 Wrap the exposed copper wire with U3

Installation of dust cover

Dust cover (Upgrade version accessories need to be purchased separately)

Z1 plexiglass (transparent)
31*23*0.18cm
(1 Piece)

Z2 plexiglass (transparent)
31*25*0.18cm
(2 Pieces)

Z3 plexiglass (transparent)
25*22.64*0.18cm
(2 Pieces)

Stick Z1 and Z2 on Z3

stick five pieces of plexiglass dust cover as shown

Ripped one side of kraft paper, leaving one side of kraft paper

Take out the plexiglass and tear off the kraft paper with text on each piece of plexiglass.

Torn side of the kraft paper faces inward, untorn side faces outward.

Use U3 to secure the acrylic joint (or substitute with transparent tape).

Each joint between the acrylic sheets needs to be secured with U3 (to prevent the sheets from falling).

Apply glue to the glass joint and scrape lightly for penetration (red line indicates the joint).

The junction of two pieces of plexiglass needs to be fixed with U3 (to prevent the plexiglass falling off)

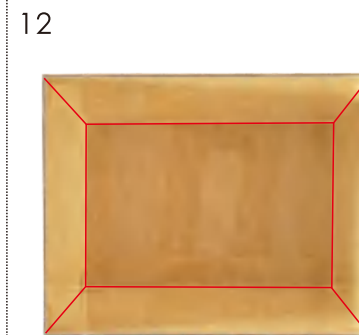

Apply glue to the interface between the two glass pieces and gently scrape to ensure the glue penetrates the joint (red line indicates the acrylic joint).

The junction of two pieces of plexiglass needs to be fixed with U3 (to prevent the plexiglass falling off)

Apply glue to the interface between the two glass pieces and gently scrape to ensure the glue penetrates the joint (red line indicates the acrylic joint).

The dust cover needs to be glued at 8 interfaces.

Leave it for 1 hour. After the glue dries out, tear off a layer of kraft paper outside the plexiglass.

Detail drawing

The instruction manual should be keep, after assembled.
